TELESPAZIO KONNECT VHTS SERVICES

EVOLVING
CONNECTIVITY WITH
TELESPAZIO EXCELLENCE

With 60 years of experience in the satellite telecommunications industry, Telespazio is pioneering new solutions for its customers, able to guarantee reliable and resilient **connectivity services**.

Telespazio, thanks to the innovative features of the new **Eutelsat Konnect VHTS**, a 500 Gbps capacity satellite built by Thales Alenia Space, is able to provide the European, North African and Middle Eastern markets with innovative **reliable broadband connectivity services**.

Eutelsat Konnect VHTS is the new frontier of **fixed and mobile** services for Government, Defence, Enterprise and Maritime markets.

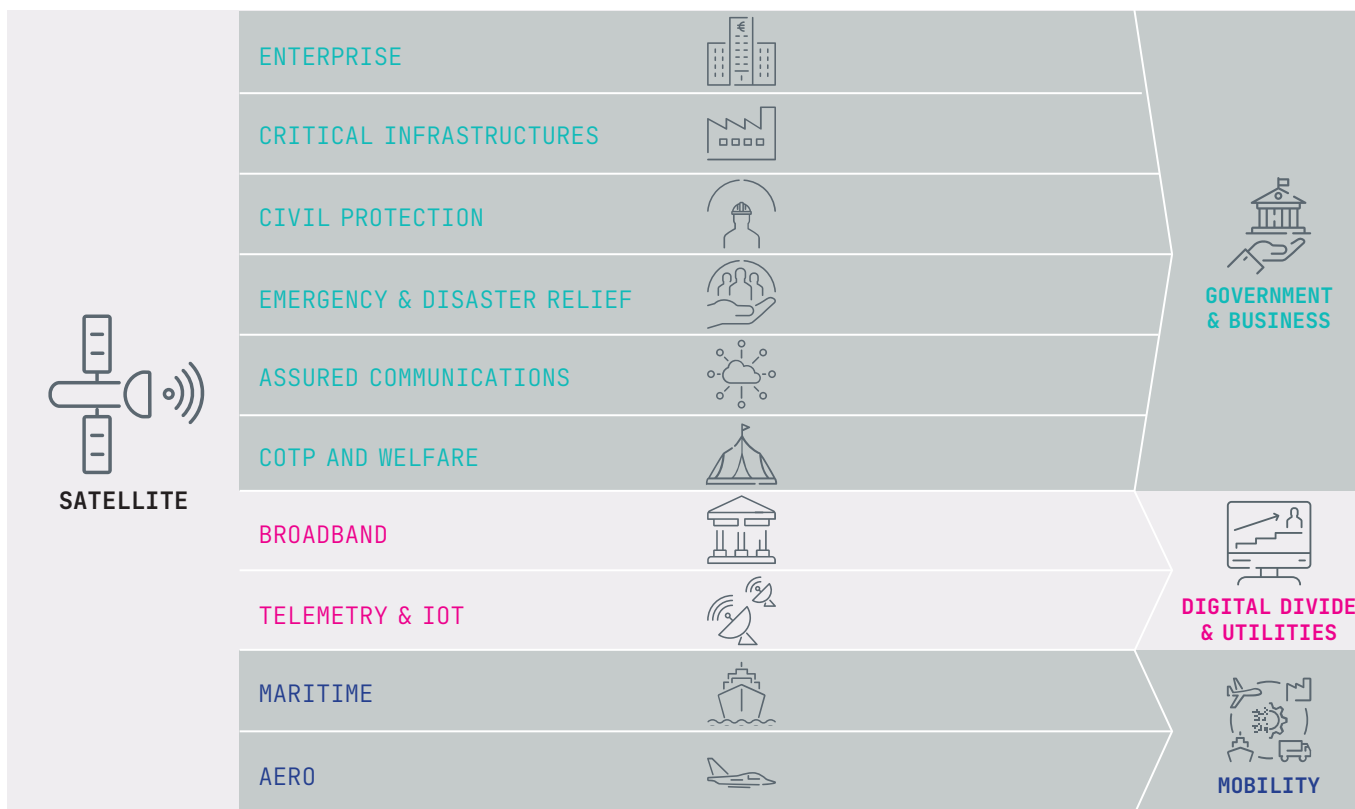

Thanks to this powerful asset, Telespazio's offer is suitable for a broad range of applications, from simple internet access to more complex requirements of institutional Customers such as secure VPN access or a completely private network and dedicated intranet service access with restriction policies.

In addition, Telespazio is the **exclusive service provider for Government** and Defence market segments.

Telespazio's **scalable and flexible ad-hoc solutions** represent the state of the art in telecommunications, guaranteeing an end-to-end turnkey service of the highest standard.

Telespazio leveraging on its unique set of Teleport assets, can provide dedicated and secure connectivity in any place and for any need. In particular, the Telespazio **Scanzano Space Centre, in Italy**, hosts one of Konnect VHTS's gateways and together with **Fucino Space Centre**, in Italy and can be reliably used by those Customers who want to have a more secure and protected data flow to their premises.

Telespazio ensures the continuity and quality of all services to its Customers. From our main control centres, our teams operate 24/7, constantly monitoring the status of the services, to guarantee the best quality reception and transmission.

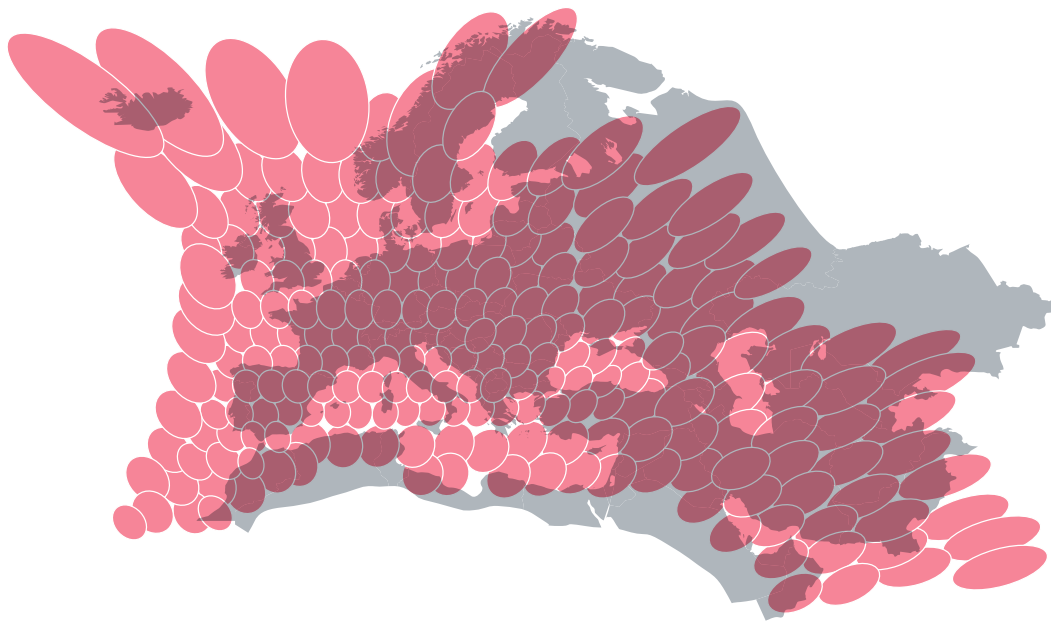

TELESPAZIO'S KONNECT VHTS SERVICES

STANDARD PLANS	ENTRY	Affordable cost & Easy maintenance	Utilities (IoT and Telemetry)
